Building Construction Projects

The Wildish Way

Wildish is a trusted and reputable name and our success is attributed to the satisfied customers who continue to seek our services. Established in Lane County, Oregon we have been in business continuously since 1935. Our rich history and deep experience make us one of the most diversified yet focused companies in the state of Oregon. Wildish a four-generation family-owned business, and we provide clients with expertise that serves every aspect of a project. Our five separate divisions offer the following services:

Wildish Sand & Gravel - Provides aggregate, ready mixed concrete and asphalt materials as well as recycling of similar resources.

Wildish Land Co. - Manages all company owned real estate property and acquisitions.

Wildish Construction Co. - Provides general road, site work, underground utility, large diameter pipe, cast-in-place concrete and asphalt construction.

Wildish Building Co. - Specializes in commercial, industrial, educational buildings, sports facilities and wastewater/water plants. Also provides CM/GC services with self-performing cast-in-place concrete and carpentry work.

Wildish Standard Paving - Specializes in bridge and major highway, runway and transit projects.

As a member of the US Green Building Council we support sustainable construction techniques and use of sustainable materials to conserve non-renewable resources, contribute to clean air and water quality, support the local economy and save money. We are committed to strategies that will both meet and exceed sustainable design goals for all projects.

With corporate offices in Eugene and satellite offices across the state, we serve clients as a CM/GC, design-build and general contractor on a variety of projects. Our long term relationships with architects, engineers, subcontractors and suppliers, combined with our team approach, eliminates the "learning curve" and provides project owners a significant benefit. We have several hundred pieces of heavy equipment to assist us in building your project. We typically self perform structural and architectural concrete, carpentry, site work, and site paving.

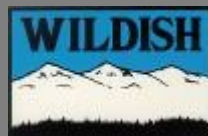

Under the leadership of Jim Wildish, the company's President and CEO, the company has contributed funds and volunteer efforts to more than 100 organizations in the greater Willamette Valley. "We feel a very compelling need to give back to the community that has given us so much. Our goal is to help you with your project no matter the size, and believe our family values are still a big part of who are today."

RESPECTED, TRUSTED & PROVEN

The Wildish group of companies is a results-oriented construction contracting organization that guarantees top value on every project we undertake. Working hard and pulling together with the owner and design team, we have proven time and again our commitment to leadership, dedication and superior construction. Our experts can handle the most complex project with confidence from design-build, fast track, and CM/GC, to GMP and lump sum contracts. We know through experience that strong client relationships are critical to the success of a project. Our unique and diverse blend of professionals makes Wildish a valuable partner. Our entire project team and group of executives are accessible to you as we move forward with your vision and execution of your project. Our goal is to provide complete satisfaction to all of our clients.

TRANSPORTATION

Transportation systems are one of the most important parts of our nation's infrastructure. Wildish has built or re-furbished numerous highways, benefit your project needs are unique to the demands of

runways, bridges and mass transit facilities. Our experience will through systems and processes that we have developed which transportation construction.

LTD EmX BUS RAPID TRANSIT

BRIDGES

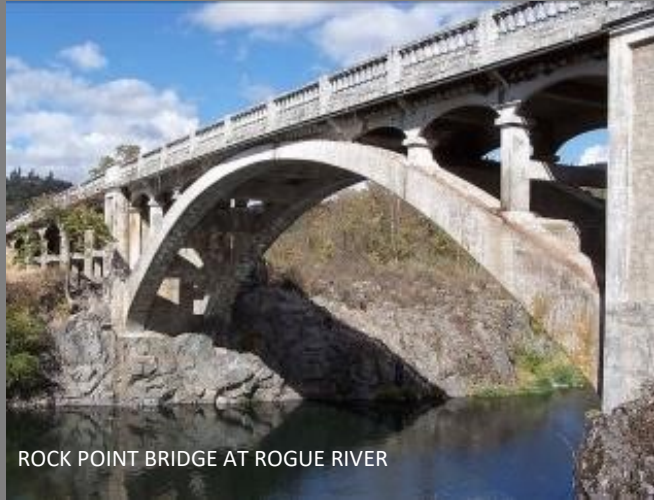

Building bridges is one of our greatest passions. If you are considering seismic upgrades, historical renovations or new construction, Wildish will deliver a finished product that will be appreciated and admired for years to come.

MONROE STREET BRIDGE

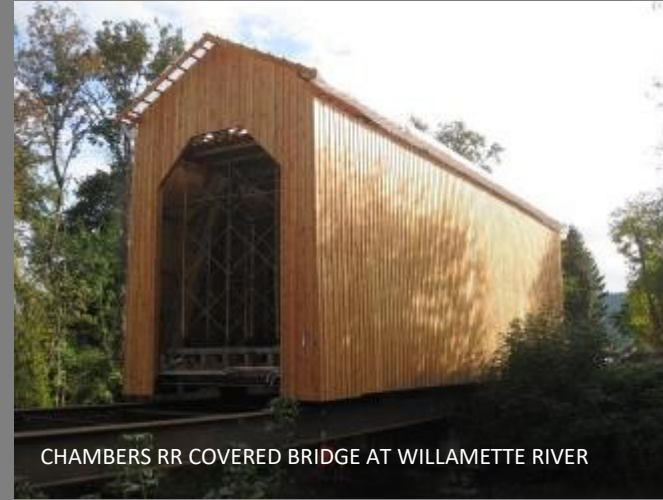

The Oregon City Arch Bridge between West Linn and Oregon City is the only through-arch steel bridge covered in shotcrete in the U.S. Work included extensive removal and replacement of shotcrete, deteriorated steel members, concrete bridge rails, light baluster posts and high performance concrete deck overlay. Performing this kind of historical bridge restoration is dangerous work, but our years of experience and technically sound management team bring a level of competence like no other.

ROCK POINT BRIDGE AT ROGUE RIVER

GREEN BRIDGE AT SOUTH YAMHILL RIVER

CHAMBERS RR COVERED BRIDGE AT WILLAMETTE RIVER

I-84 AT FIFTEEN MILE

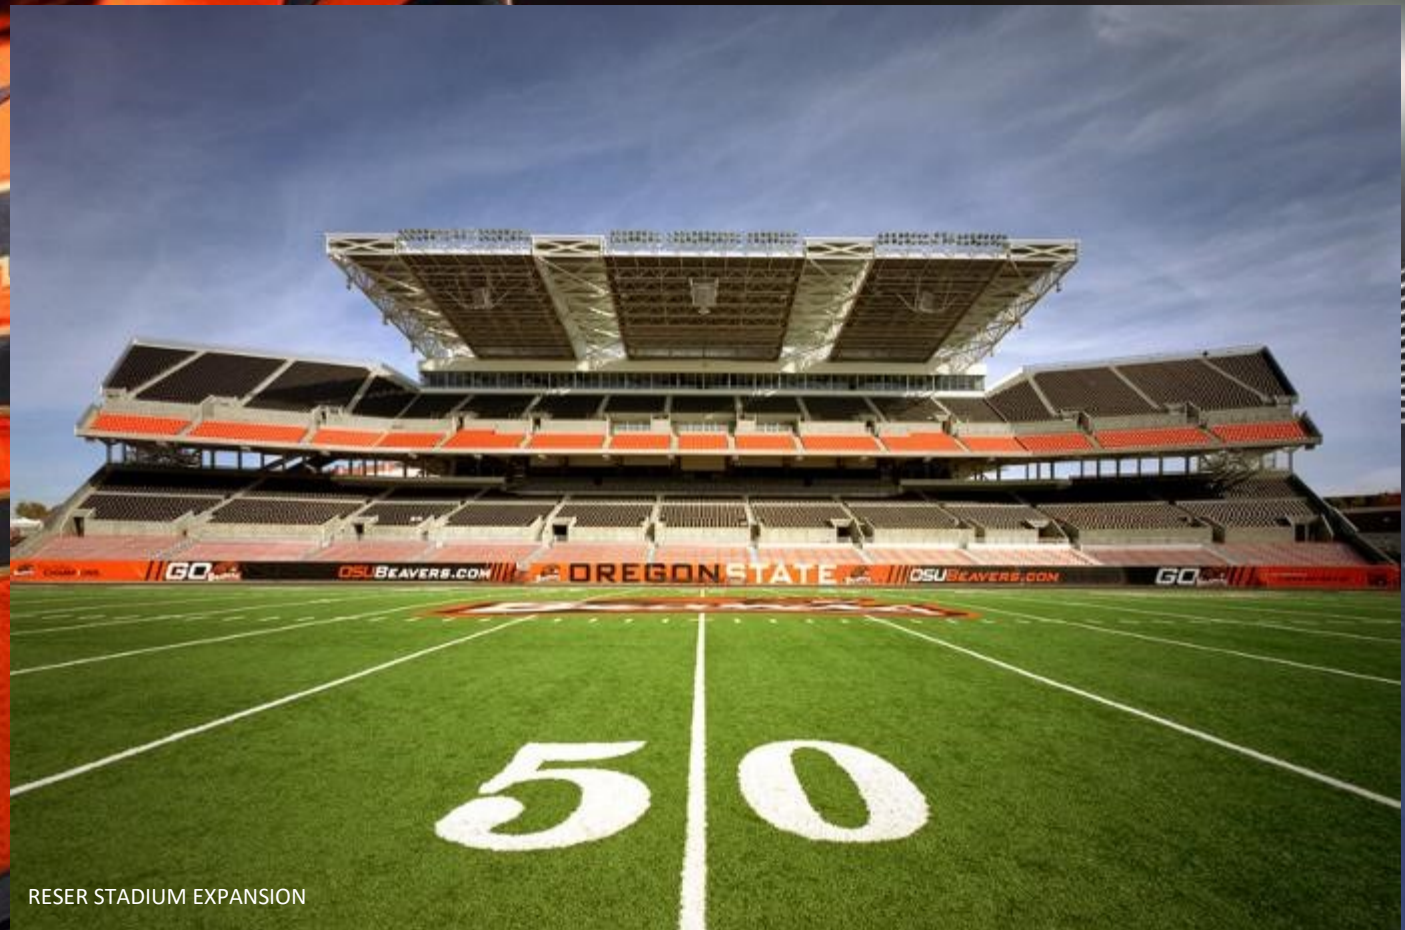

The Wildish suspension bridge spans the McKenzie River and is one tenth the length of the Golden Gate Bridge in San Francisco. An efficient electrically driven conveyor belt transports sand and gravel from our pit on one side of the river to our processing facility on the other side. This eliminates traffic congestion and noise, dust and green house gas emissions associated with conventional petroleum powered hauling trucks.

SPORTS FACILITIES

Wildish knows fast track projects and how to deliver state of the art sports facilities on time. Whether it's stadiums, basketball courts or field turf we have extensive experience to ensure opening day schedules are met and embraced.

EDUCATIONAL FACILITIES

Wildish understands college and university construction. Whether it's a fast-track, multi-phased renovation in the heart of an occupied classroom building, or a new, multi-story facility with challenging site issues, you can depend on Wildish to bring your project in on schedule, on budget every time. Wildish has focused its attention on college and university campus facilities for over two decades. We are adept at managing critical campus issues of safety, site security and access, with an unyielding commitment to personal attention throughout every phase of your project.

PUBLIC WORKS

Facilities that serve our community are reflections of life, activity and humanity. Their construction requires a company that is sensitive to the ever-changing needs of the users, the daily routine of neighbors and adjacent businesses, and the necessary balance of functionality and quality. Wildish has delivered multiple public works facilities across the state including pump stations, power generation facilities, maintenance shops, fire stations, airports, dams, fish ladders, wastewater/water treatment facilities, and cost effective tilt-up structures for municipalities.
